TDC Systems Integration (TDCSI) is an award-winning, multi-million dollar, minority business. The privately held, minority firm is located just North of Atlanta. We are a full service systems integrator whose services and support focus on maximizing business productivity for companies of every capability, resource and size.

TDCSI offers a broad range of services to its clients and partners. For TDCSI, the key to making technology usable is to remain flexible while customizing each solution. This approach to our service delivery is much appreciated by the diverse clientele it serves in the following industries:

- Aviation
- Dept. of Transportation
- Education
- Healthcare
- Public Safety
- Local, State and Federal Municipalities

- Privately held firm
- Antonio Dozier, CEO
- \$14M in DOT contracted work within 1st year
- Established in 1995

OUR PARTNERING PHILOSOPHY

TDCSI specializes in the planning, coordinating, scheduling, testing, implementing, improving and in some cases, maintaining computer operations. Whether it's designing and implementing a data center for a new building, upgrading existing flight information display systems (FIDS) and common use ticket equipment (CUTE) for airports, designing and implementing a state of the art cyber court room, or providing 24X7 technical support for a 911/emergency operations center, TDCSI is known for delivering excellence.

Often, our role involves coordinating with hundreds of companies responsible for providing hardware, software, wiring and communications to a computer's operation.

A number of our partnering firms have teamed with us to win significant competitive contract vehicles allowing our joint teaming to offer a broad range of services and products to our clients. This teaming is not only due to our capabilities, financial strength, and qualifications, but also it's a direct result of our highly professional in-house proposal development abilities that rival many larger firms and our staff's ability to deliver highly complex solutions at affordable prices.

TDC Systems Integration continues to team with many firms in securing new business as both a prime contractor and a subcontractor.

We are very proud of the work that we have done and of our highly professional, skilled staff.

TDCSI is a thriving multi-million dollar minority owned small business headquartered in metropolitan Atlanta. Currently, the company employs more than 50 full-time employees and provides project work to hundreds of skilled independent contractors.

In 2007, TDCSI received numerous awards for our dedication to customer service, financial strength, community service and employee benefits.

OUR TEAM

In 1995 when the TDCSI was founded, there were less than 10 full-time employees and only a few projects. Currently, TDCSI has over 50 full-time employees and managers to oversee and execute responsibilities such as project management, information technology, electrical, marketing, HR and accounting. The company generates annual revenue of over \$10 million.
