SUCCESSFUL CITY OF ATLANTA PARTNER

TDC Systems Integration (TDCSI) has been working with the City of Atlanta since 1997. Our firm is an award-winning, multi-million dollar, minority-owned business. TDCSI is located just North of Atlanta in Smyrna, GA.

OUR PARTNERING PHILOSOPHY

TDCSI specializes in the planning, project management, coordinating, scheduling, testing, implementing and in some cases, maintaining computer operations. Whether it's designing and implementing a data center for a new building, upgrading existing flight information display systems (FIDS) and common use ticket equipment (CUTE) for airports, designing and implementing a state of the art cyber court room, or providing 24X7 technical support for a 911/emergency operations center, TDCSI is known for providing service excellence to our clients and partners.

The following is a summary list of projects successfully completed by TDCSI for the City of Atlanta:

Office of the Mayor: Installed telecommunications, PC cabling for new and existing offices; upgraded desktop PCs, servers and network equipment; provided training for new equipment.

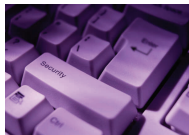

Department of Finance: Designed and implemented sanitation and property tax billing collection system; installed telecom and PC cabling; upgraded PCs, servers and network equipment; conducted MCSE and network computing training to IT staff.

Atlanta City Courts: Customized and installed a case management system to automate daily court functions and transferred cases from the mainframe to an Oracle database solution; created Website allowing on-line payment of citations; installed interactive voice and data system to accept phone payments; created and implemented PC based Cyber Court; designed network cable layout for new courtroom.

Atlanta Police & Fire Departments: Provided telecom, PC and fiber cabling for various Precincts and the 911 call center; designed and implemented 911 network infrastructure to remain active if one of the components fails; upgraded and installed network equipment; provided ongoing network technical support; managed PC and network onsite staffing.

Hartsfield-Jackson Atlanta In'tl Airport: Planned and implemented Wide Area Network (WAN) connecting 13 different airport buildings; provided phone, cable TV, PC and fiber cabling within terminal and offices; designed and implemented airport Website (Atlanta-airport.com); provided server upgrade and network equipment services; conducted MCSE training classes to IT staff; implemented Oracle Financials package; managed desktop support for 3 years; currently under contract to provide tech support for an additional 2 years with two, 5 year options.

Celebrating Over 13 Years of Business Excellence

Department of Motor Transport:

Installed Oracle-based system and relocated department's data from mainframe to the new system; provided MCSE training for IT staff.

Department of General Services:

Established telecom, cable TV, fiber and PC cabling services; upgraded desktop PCs, network and server equipment; contracted for 5 years to perform tech support for all cabling and network in over 300 locations.

Law Department:

Provided telecom, PC and cable TV cabling services; upgraded desktop PCs, printers and network equipment; performed network support duties.

Department of Purchasing:

Provided telecom and computer cabling services; performed desktop support; upgraded network equipment.

Department of Parks & Recreation:

Performed upgrade of network equipment; provided tech support for network; installed telecom and computer cabling services.

Atlanta Workforce Development Agency (AWDA):

Lead in the creation of 12 public Cyber Centers and 1 Cyber bus; designed and implemented wide area network (WAN) connecting 12 separate cyber centers across Atlanta to the city's main location; provided telecom, computer and cable TV cabling services; configured and installed all desktop PC and network equipment in each center and mobile (bus) unit; designed and implemented Internet security program to protect cyber center users from external threats as well as preventing users from accessing all unauthorized Internet Websites (adult content, hate group sites, criminal sites, etc.)

Department of Public Works:

Established and configured new PCs, server and network equipment; provided telecom services, cable TV and computer cabling; designed and installed network infrastructure for new offices.
