

aviation industry

Airports have specific needs that can be challenging to understand and resolve. With an extensive base of experience in the aviation industry, TDC Systems Integration (TDCSI) can seamlessly implement airport related solutions. TDCSI is one of the few suppliers that can offer a fully integrated solution including networking, hardware, software, cabling, mill work, consulting and support.

Our firm is committed to exceeding customer expectations and providing our clients with proven technology solutions that offer reliability and effectiveness delivered with the highest degree of professionalism.

We are a full service systems integrator with a certified, skilled staff providing solutions to airports worldwide.

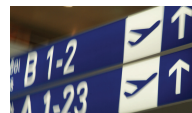

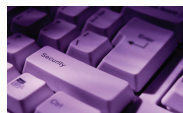

FIDS SOLUTIONS

TDCSI has been an integral part of the contracting team that successfully completed FIDS installation at the world's busiest airport, Hartsfield-Jackson Atlanta International. Today's FIDS solution offer travelers information in real-time and these systems are feature rich and easy to manage. We can provide airports with Web interface options to link information to airport Websites.

We offer reliable, cost effective and robust solutions that can be easily integrated with existing systems.

AIRPORT OPS. CTR/EMERGENCY OPS. CTR

In 2006, TDCSI helped to commission a new, state-of-the-art Airport Operations Center and Emergency Operations Center at Dallas Fort Worth International Airport.

Realizing the need to establish a central command center to more effectively manage major emergencies like Hurricane Katrina and 9/11, airports around the world are building new, high-tech airport operations and emergency operations centers also known as AOCs and EOCs. Our knowledge and experience in aviation technology is apparent with the successful completion of what is known as, "the most advanced operations center in the world post 9/11" at DFW airport.

"It was critical that our operations centers operate correctly. It was also critical that this multi-million dollar facility open on time.

TDC, as part of a team, was integral in making that process happen."
